Information and Contact for Recycling Stations

The Environmental Protection Department has been continuously developing the projects of Recycling Stations since 2015, and there are 11 Recycling Stations in operation. In addition to supporting community recycling, the Recycling Stations also organise various environmental education activities to instill a green lifestyle into the community.

Schools can contact the nearby Recycling Stations by their districts located to arrange visits or participate in their source separation and recycling education activities. Quotas will be allotted on a "first-come, first-served" basis. Operators do not guarantee to arrange relevant activities to schools. The contact information of the Recycling Stations are as follows:
